

April 15, 2021

Dear Selectmen,

I am very interested in becoming a Selectman for the Town of Warren. I want to provide you with a few explanations of why I am a good candidate to fill the vacancy spot on the Select Board. I love this town! I have since the first time I drove through it many years ago. I have been on the Planning Board for the past 2 years. In my time on the Planning Board I have gained more knowledge about mapping, building, subdivisions and zoning regulations.

Those are just a few of the skills I have learned during my time here in New Hampshire. However, I would also like to share some of the experience I have as well that would make me a great candidate for this position. I have fundraising and management experience and possess the knowledge and understanding of community involvement. I have organized events such as Special Olympics Relay for Life, Walk for Life, membership drives, and much more. In planning these events I have advanced my knowledge in the areas of time management and organizational skills that will help me work best on the Select Board. I also have the ability to view things with an open mind, which I believe is a key factor to being a strong and competent board member. Being open minded helps me to make important decisions with no preconceived agenda or feelings. I am able to think rationally and with caution to accomplish what is best for the community.

I have laid out for you just a few of the capabilities I have that make me a great match for this opportunity. Most importantly, I am a "roll your sleeves up and get the job done" type of woman. I have the ability to see things through a rational lens and come up with solutions that are best effective for the situation at hand. I want to see the best for the town I love so much.

Thank you for taking the time to read this letter and I hope to hear back soon.

Best Regards,

A handwritten signature in blue ink that reads "Shirley McCartin". The signature is cursive and includes a small flourish at the end.
